

## Features of all Photodon® Privacy Filters:

- » Clear image directly in front of the screen
- » Available for inward-curved monitors
- » Touchscreen-compatible; blue light reduction of 50%
- » Silicone adhesion that does not damage the screen
- » 2-way and 4-way options
- » High-quality, scratch-resistant materials
- » Mini louvers embedded in the material that reduce side viewing at 30, and turn the screen nearly black at 45

Material Type	Glare Reduction	Image Quality	Description
<b>Privacy Filters</b>			
	<b>40%</b>		<b>P2L (2-Way Privacy Filter):</b> Adheres with clear double-sided adhesive strips. Provides privacy from two directions. Small reduction of image quality, with a slight darkening effect. Easy to install. Can remove and reinstall many times.
	<b>40%</b>		<b>P2S (2-Way Privacy Filter Silicone):</b> Provides privacy from 2 directions. Adheres directly to the monitor with full silicone adhesion. Recommended for all devices, except for in-dashes. Small reduction of image quality, with a slight darkening effect.
	<b>40%</b>		<b>P4S (4-Way Privacy Filter Silicone):</b> Provides privacy from 4 directions. Adheres directly to the monitor with full silicone adhesion. Recommended for all devices, except for in-dashes. Small reduction of image quality, with a slight darkening effect. <b>Maximum Small Dimension = 466 mm (18.34")</b>

## Features of all Photodon Clear Screen Protectors:

- » Clear image (no anti-glare)
- » High-quality, scratch-resistant materials
- » 1m-wide material rolls for most; length varies by roll
- » Silicone adhesion that does not damage the screen
- » Protection from harsh cleaning products
- » Oleophobic coating that repels oil; touchscreen-compatible

Material Type	Glare Reduction	Image Quality	Description
<b>Clear Screen Protectors</b>			
	<b>0%</b>		<b>9HO (Abrasion Resistance):</b> High optical clarity. Extreme abrasion resistance with smooth touch. Recommended for industrial settings or environments where the device is at higher risk of damage and for drawing tablets. <span style="float: right;">\$\$\$</span>
	<b>0%</b>		<b>ARC (Anti-Reflective):</b> Excellent image quality. Anti-reflective coating reduces the amount of light reflected from the screen. Recommended for mobile, in dash, gaming, and color critical work. <span style="float: right;">\$\$\$</span>
	<b>0%</b>		<b>HSC (Hard Shock-Absorbing):</b> High optical clarity. Provides excellent impact protection with enhanced abrasion and scratch resistance. Recommended for industrial-type settings or environments where device screens are at high risk of damage. Contains anti-microbial properties. <span style="float: right;">\$\$\$</span>
	<b>0%</b>		<b>MXB (Blue Light Reduction):</b> Good optical clarity. Cuts up to 93% of high-energy light on the blue / violet band from 400-450nm. Helps with computer eye strain, macular degeneration, or sleep issues related to device screens. Has a blue tint when in sunlight. Not recommended for stylus use. <span style="float: right;">\$\$</span>
	<b>0%</b>		<b>MXO (Basic Clear):</b> High optical clarity. Recommended for all devices. Creates a slippery surface with stylus use. <span style="float: right;">\$</span>

## Features of all Photodon Anti-Glare Screen Protectors:

- » The lower the percentage of anti-glare, the clearer the image is with more surface reflection
- » High-quality, scratch-resistant materials
- » Touchscreen-compatible
- » The higher the percentage of anti-glare, the more matte the protector is with less surface reflection
- » Protection from harsh cleaning products
- » Silicone adhesion that does not damage the screen

Material Type	Glare Reduction	Image Quality & Ease of Cleaning	Description
<b>Anti-Glare Screen Protectors</b>			
	<b>25%</b>		<b>MXH:</b> Light matte finish. Provides a paper-like feel on drawing tablets that is slightly more slippery than with stylus use. Most popular for drawing tablets and in-dash screens. Some surface reflection in bright light. Low fingerprint retention. <span style="float: right;">\$\$</span>
	<b>50%</b>		<b>MXT:</b> Medium matte finish. Provides a paper-like feel on drawing tablets with stylus use. Recommended for all devices. Popular anti-glare solution for industrial displays, televisions, churches, and outdoor displays. Low fingerprint retention. <span style="float: right;">\$</span>
	<b>85%</b>		<b>MXG:</b> High matte finish. Best at minimizing overhead light reflection. Recommended for large displays such as televisions and presentation displays. Also works well on small devices. Low fingerprint retention. <b>Note:</b> May cause gray-outs if viewed from the side. <span style="float: right;">\$\$</span>
	<b>85%</b>		<b>AGB:</b> Anti-Glare Blue Light. High matte finish. Recommended for most devices. Popular for tablets and computer monitors. Cuts up to 93% of blue light. Helps reduce eye strain and sleep issues. <b>Note:</b> May cause gray-outs if viewed from the side. <span style="float: right;">\$\$</span>
	<b>85%</b>		<b>HSG:</b> High matte finish. Provides extra protection against blunt force impact. Industry-leading scratch resistance. Recommended for industrial use or fieldwork where devices are at a high risk of damage. <b>Note:</b> May cause gray-outs if viewed from the side. <span style="float: right;">\$\$\$</span>

We also offer microfiber cloths and screen cleaners to keep your devices looking clean and professional. We offer them separately or in a kit.
