PAST PERFORMANCE:

Census Bureau

Subcontracted on #GS-02F-0096R to provide anti-glare screen protectors for [Elite Book Tablets](#)

FBI

Photodon was awarded the prime contract on #DJF-16-011-P-0008722. We provided [custom cut privacy filters](#) for this contract.

US Airforce

Photodon custom cuts [3M adhesive backed microfiber cloths](#) used to protect pilots' helmet lenses from being scratched.

THE BOSTON CONSULTING GROUP

CASE STUDY #1:

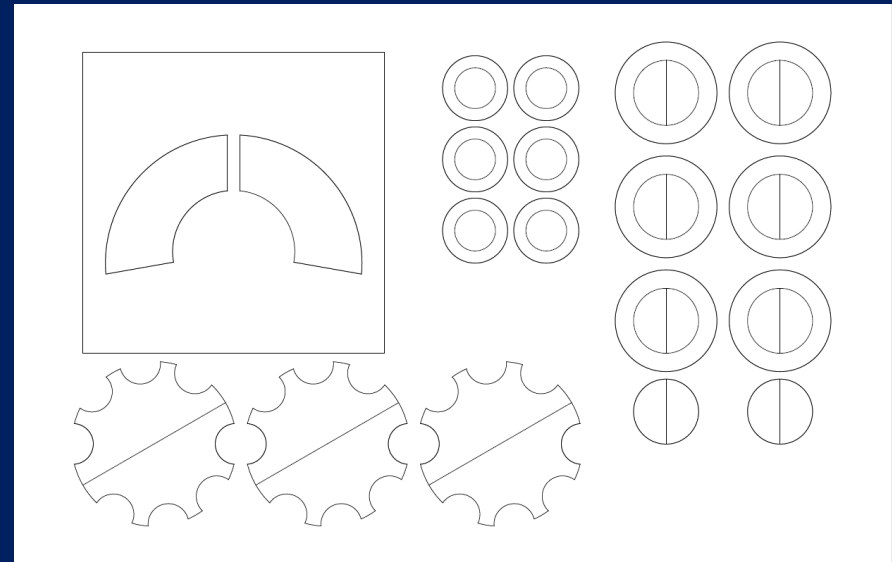

The Challenge:

Knolls Atomic Power Laboratory (BMPC-KAPL) came to us with a request to make decals for computer screens for navy training exercises (see image).

Photodon's Solution:

Samples of MXO (clear) silicone backed films were sent. Once material was approved by BMPC-KAPL, Photodon made kiss-cut sets of shapes (using their artwork) and assigned a part for easy future ordering.

CASE STUDY #2:

The Challenge:

The FBI Quality Improvement Unit in Clarksburg, West Virginia needed to provide privacy for hundreds of their older monitors. They were unable to find privacy filters for their devices.

Photodon's Solution:

We worked with our contact at the FBI to get measurements of the various monitors. Paper templates were sent to ensure a proper fit prior to full production. Bulk discounted, perfectly fitted filters were sent within 3 weeks of the purchase order submission. Total number of filters: 450 (ranging from 24-30 inches).

Privacy filter for a curved monitor

Prime Contract #DJF-16-011-P-0008722

CASE STUDY #3:

The Challenge:

The US Census Bureau needed 7,000 anti-glare screen protectors for their HP EliteBook Revolves 810's for use in the 2020 census.

Photodon's Solution:

We were a subcontractor with EZ Print (Kentuckiana Copy Supply) and provided bulk priced, individually-packaged, anti-glare screen protectors with installation kits. Our shipping manager worked with the shipping company to ensure safe delivery (they were shipped on a pallet). They arrived safely & on time.
